

Cedric Lary

larylc.github.io/Independent-Projects-/index.html | cedric.lary1@gmail.com | github.com/larylc

Languages and Libraries: R (R Studio), Python, SQL, HTML, CSS, JavaScript, D3.js

Technical Tools: Microsoft Office (Word, PowerPoint, Excel), Tableau

Technical Skills: Regression (Linear, Multiple-Linear, Logistic), ANOVA, PCA, Sentiment Analysis, Topic Modeling, Data Cleaning & Interpretation, Data Visualization

PROJECTS

DreamWorks, Disney, or Pixar | *Data Visualization Webpage* [link](#)

- A responsive webpage that showcases differences between computer animation studio movies using interactive data visualizations.
- Applied Python for web-scraping, R for data manipulation, and HTML, CSS, and D3.js for visualizations.

Pathway to Prodigy | *Shiny App* [link](#)

- A web application that allows users to compare chess prodigy ratings by age ranges.
- Used BeautifulSoup, Scrapy, and Googlesearch Python modules for web-scraping.
- Built in R using Shiny and Highcharter packages.

Grandmaster B-days and B-places | *Web-Scraping Project* [link](#)

- Used a combination of R and Python modules and packages to extract and format chess player birthday and birthplace data from Wikipedia.

Features of One Gender Schools | *Exploratory Analysis* [link](#)

- An exploratory analysis of differences between single-sex colleges and co-ed colleges.
- Implemented various R packages to process, analyze, and visualize college data.

EDUCATION

Swarthmore College **Sept 2017-May 2019 | Swarthmore, PA**
Bachelor of Arts in Biology and Education, Overall GPA: 3.33
Honors: Sigma Xi Honors Research Society

Mercer County Community College **Sept 2015-May 2017 | West Windsor, NJ**
Associate of Science in Biology and Chemistry, Overall GPA: 3.67
Honors: Phi Theta Kappa Honor Society, American Honors

RELEVANT EXPERIENCE

Mountain Lake Biological Station **June-Aug 2018 | Pembroke, VA**
Research Assistant

- Collaborated with a team of researchers to survey forked fungus beetles in the field and update beetle database entries in the laboratory.
- Independently investigated how movement affected forked fungus beetle centrality using a general linear model in R.
- Presented poster titled "Movement Among Mating Arenas Predicts Individuals' Centrality In Some Social Networks" during Sigma Xi poster session.

The Watershed Institute **June-Aug 2017 | Pennington, NJ**
Delaware River Watershed Fellow

- Gathered, managed, and monitored water quality data for Jacob's Creek to assess the impact of weather and changing land use.
- Presented Jacob's Creek findings to science faculty and students during honors research presentations at Mercer County Community College.
